Taking the best aviation grade epoxy and urethane coatings technologies available, and combining them with a flat aggregate, **PERFLECK™** delivers a remarkably durable floor with stunning good looks. Under your family car or your corporate jet, you simply cannot find a more attractive, durable, low maintenance concrete floor protection.

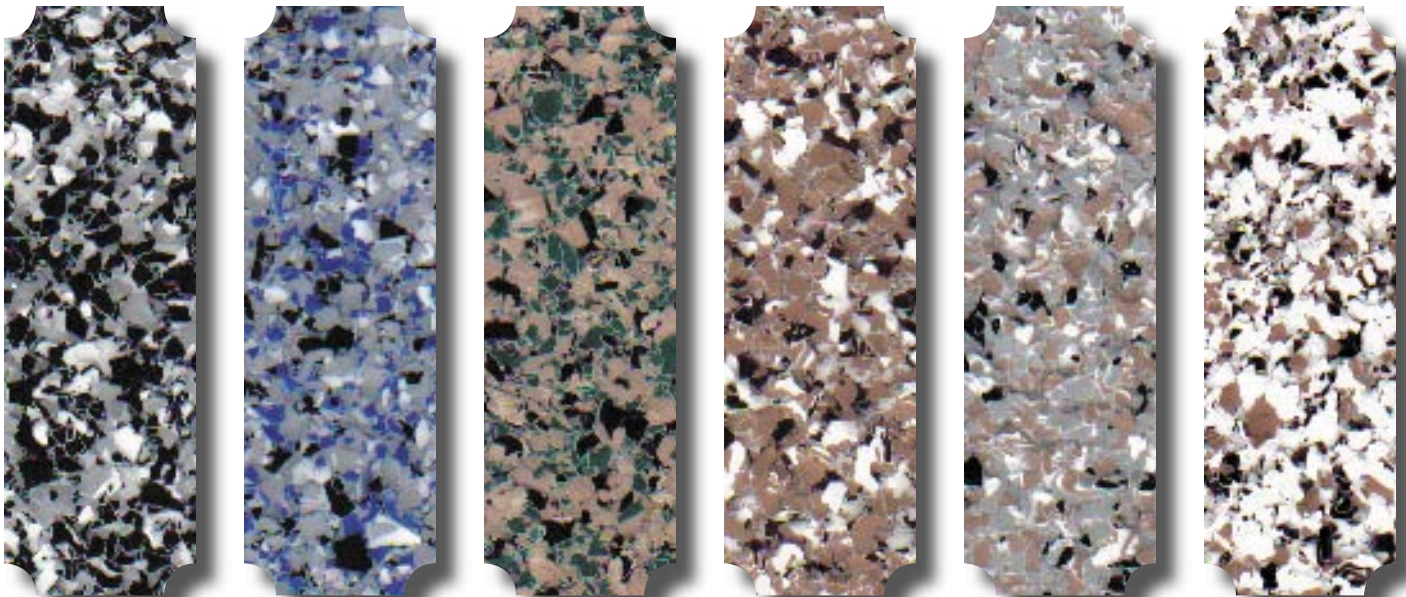

- *UV Stable*
- *Interior and Exterior*
- *Tire Mark Resistant*
- *Jet Fuel Resistant*
- *Abrasion Resistant*
- *Easy to Clean*
- *Low Odor Install*
- *Quick Install*

Some designs resemble the beauty of terrazzo or natural stone, others are combinations even Mother Nature couldn't create.

A thick, self leveling base coat and saturation broadcast means no trowel marks or thin spots. Colors run deep and won't quickly wear off in the drive lanes. **PERFLECK™** is so thick, it can actually be sanded and refinished much like hardwood floors or marble to repair minor damage.

A **PERFLECK™** floor is comfortable to walk on, easy to maintain and cannot not trap mold or odors, It is unsurpassed in stain and abrasion resistance and provides endless design opportunities.

Popular blends shown, others samples available. Ask about custom blend options.
